VANGALA PRANITEJ

Software Engineer

Warangal, Telangana, India | +91 80741 22800 | vangalapranitej@gmail.com | linkedin.com/in/vangala-pranitej | github.com/Pranitej

PROFESSIONAL SUMMARY

Software Engineer specializing in the MERN stack. Shipped 3 production multi-tenant SaaS platforms for online examinations, invoicing, and food delivery. Built 375+ REST endpoints secured with JWT, RBAC, and Razorpay payment integration. Achieved ~80% lower API latency with Redis caching and deployed every platform via Docker, CI/CD, and VPS infrastructure.

EXPERIENCE

Freelance Software Developer | VM Software Solutions **Oct 2025 – Present**

- Delivered 3 production web applications end to end on the MERN stack, owning requirement scoping, development, deployment, and support.
- Provisioned production infrastructure on a Hostinger KVM VPS using Dokploy, Docker, and Traefik with automated SSL. Operated self-hosted MongoDB backing 3 client applications.
- Integrated 3 third-party services across client projects: Razorpay payments, Resend transactional email, and Cloudflare R2 storage.

EDUCATION

B.Tech, Computer Science Engineering (AI & ML) | Vaagdevi College of Engineering, Warangal | GPA: 7.5/10 **2021 – 2025**

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), Java, Python, SQL
- **Frontend:** React.js, Next.js, Vite, Tailwind CSS, Redux, Zustand, shadcn/ui, Material-UI, HTML5, CSS3
- **Backend:** Node.js, Express.js, RESTful API Design, Webhooks, Server-Side Rendering (SSR)
- **Databases & Caching:** MongoDB, Mongoose, PostgreSQL, MySQL, Redis
- **DevOps & Cloud:** Docker, GitHub Actions (CI/CD), Linux, AWS, Cloudflare R2 (S3-compatible), Traefik, Dokploy
- **Security & Tools:** JWT, OAuth, RBAC, Helmet, Rate Limiting, Input Sanitization, Razorpay, Postman, Git, Figma
- **Architecture:** Multi-Tenant SaaS, API Security, Caching Strategies, Payment Gateway Integration

PROJECTS

Test Arena — Multi-Tenant Online Examination Platform Live Site

React 19, Vite, Zustand, Node.js, Express 5, MongoDB, Redis, GitHub Actions, Cloudflare R2

- Engineered a 165+ endpoint REST API across 15+ modules, isolating each college as its own tenant with 3-role access control.
- Developed an NTA-style exam engine for SCQ, MSQ, and FIB formats with negative marking and tamper prevention. Load-tested for 15,000+ concurrent test-takers.
- Automated bulk Excel imports of 1,000+ student records per upload and shipped releases through GitHub Actions CI/CD. Cut response times ~80% with Redis TTL caching.

Craft Quote — Multi-Tenant SaaS Invoice Generation Platform Live Site

React 19, Vite, Tailwind CSS, Node.js, Express 5, MongoDB, Puppeteer, JWT

- Built a multi-tenant SaaS invoicing platform with 60+ REST endpoints. Isolated tenants on a single database through 3-layer middleware.
- Designed a quote builder with 9 server-rendered PDF invoice templates generated by Puppeteer.
- Enforced 3-role RBAC and a 2-tier subscription system. Hardened APIs with Helmet, rate limiting, XSS/NoSQL sanitization, and Winston logging.

Wing Zone — Food Delivery & Restaurant Management Platform Live Site

Next.js, Node.js, Express, MongoDB, Redis, Razorpay, Cloudflare R2, Docker

- Architected a multi-outlet food-ordering platform with dedicated customer, restaurant, and admin portals spanning 24 feature modules.
- Protected 150+ REST endpoints with JWT access/refresh tokens and role-based permissions, and added a Redis caching layer with MongoDB fallback that reduced average API response time by ~80%.
- Implemented Razorpay payments with HMAC-verified webhooks. Containerized the app with Docker and reduced media load time by ~80% via Cloudflare R2 CDN.
